

Group Members:

Tommy Ahn, Chang Hi Lee, Luke Belusko

To discuss the preliminary report and apply for OR observation, the group will meet on Nov. 1st with Dr. Thompson and receive feedback on additional product requirements and specifications. Also, acquiring OR observation access will enable the group to observe Dr. Thompson during surgery and experience his difficulties with the current retractor solution during TOS surgery. In addition, the team plans to brush up on the team website and LabNotebook to fill in any missing documents. The team will have a meeting during the next few days to discuss Dr. Thompson's feedback and incorporate these into the website and LabNotebook.
